

Improve comprehension and proficiency fast!

Vocabulary is hugely important. The problem is there are many thousands of words to study.

V-Check removes the words you already know so that you don't waste time.

WordEngine is super fast and efficient because you study just the words you need.

Start with the V-Check vocabulary test – it's FREE!

The V-Check vocabulary test is an IRT-based computer adaptive test. It identifies your known words and creates a personalized list of unknown words to quickly improve your comprehension of each subject domain.

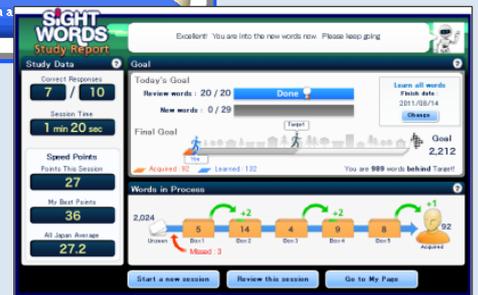

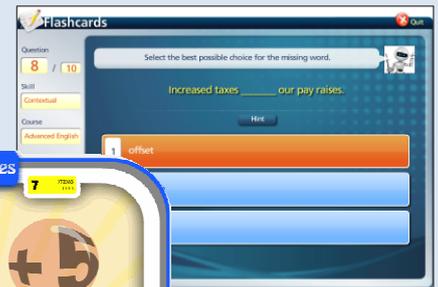

Study just the words you do not already know

Focus on studying the words you really need!

WordEngine promotes fast recognition and fast comprehension. Our spaced repetition system assures long-term memory for all your newly learned words.

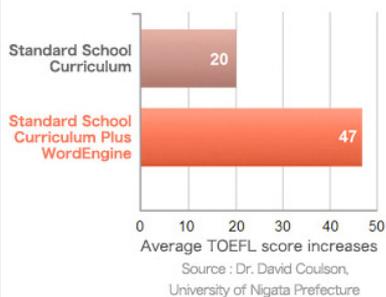

Students enjoy our high speed "serious games."

WordEngine increases TOEFL and TOEIC scores

Score data from more than 1,000 students shows that improved TOEFL and TOEIC scores resulted from as little as 8 minutes per day with WordEngine.

TOEFL pbt score improvements

For Teachers and Administrators!

Our FREE V-Admin learning management system reports V-Check scores and monitors learning progress. Go ahead... set a weekly goal for your class and let WordEngine do its thing!

WordEngine's Learning Method

Spaced repetition assures long-term retention

WordEngine uses spaced repetition science to promote long-term memory retention. Each new word is automatically given repeated exposure until it is fully retained. In essence this method introduces "unseen" words and then re-tests comprehension at five increasingly greater time intervals (see charts). Users must correctly identify a word at each time interval or the word is sent back to the beginning. WordEngine allows students to fully acquire a tremendous amount of new vocabulary very quickly.

User Testimonials

Happy to see the words I studied appear in the TOEIC test I took!

The best thing about the Word Engine is that you are given focused training in the course of your choosing.

After studying for two months, I took the TOEIC and felt the Word Engine helped a great deal because I saw many words that I had studied. I felt great each time I came across a word that I had seen in WordEngine. Thanks to Word Engine I did not have any problems with vocabulary and got through the entire test with a score of 645!

Kanako Mine
University student

Because the same words repeat, I felt that I thoroughly learned them.

When I was studying for university entrance exams, I learned a lot of English vocabulary. However, since that time I have somehow forgotten it.

With the WordEngine after you study a word once, you study it again each time you are about to forget it. Thus, you are not cramming but thoroughly learning each word.

Because I have studied each word many times, I feel like I have acquired these words and increased my vocabulary.
